

RECYCLEYOUR ELECTRONICS.ca

FREE WEEE!! WEEE stands for “Waste Electrical and Electronic Equipment” and is the informal name given to electrical and electronic products that are no longer wanted by their owners.

Unwanted electronics don’t need to pile up in landfills. Most of the parts – steel, glass, copper, aluminum, plastics and precious metals – can be recovered and reused to make new products. Lanark Highlands collects WEEE at all waste sites so it can be sorted and processed at approved facilities in Ontario and Quebec, instead of being land filled or shipped to developing nations.

When you recycle WEEE you support the development of Green Industry in Canada while reclaiming valuable resources and preserving local landfill space. All of Lanark Highlands waste disposal sites accept WEEE FREE of charge. In 2010 we diverted over 13 tonnes of WEEE from our waste sites!

Designated Materials include the following:

- | | |
|---|------------------------------|
| Desktop computers | Cameras |
| Portable computers | Equalizers, (pre)amplifiers |
| Computer peripherals including modems | Radios |
| Monitors | Receivers |
