

Used Tire Recycling comes to Lanark Highlands!

The Township has registered as a Collector with Ontario Tire Stewardship. Residents can now deliver all used tires to any Township waste site for free - and be assured they will be diverted from the landfill and recycled.

Your scrap tires will be processed into a variety of Tire-Derived Products (TDPs) that can be used in the development and maintenance of roads, sports fields and playground surfaces. TDPs are also manufactured into rubber products we use every day, such as mats in skating arenas, mouse pads, engine components under the hood of your car, and sub flooring under the carpet in your basement.

Ontario is fortunate to have a number of scrap tire recyclers who currently handle approximately 50% of the scrap tires produced in Ontario each year. The balance of the scrap tires produced in Ontario today is shipped out of the province for recycling or disposal (in a landfill or by burning.) The Used Tires Program goal is to change this situation so all of Ontario's scrap tires are recycled right here in the province.

<p>Rubber Crumb</p> <p>Most of the scrap tires collected are recycled into crumb rubber, which is granules of rubber with steel and fibre removed. Crumb is then used to create a variety of products including athletic tracks, non-slip pavers for patios, walkways and playgrounds and synthetic turf fields.</p>
