## LANARK HIGHLANDS FIRE SERVICE

### SUMMARY OF FIREFIGHTERS DUTIES AND CONDITIONS FOR EMPLOYMENT

- Firefighters must perform their duties in an uncontrolled environment under emergency situations.
- The job involves the rapid change from relative inactivity to sudden strenuous activity under physically and psychologically stressful conditions.
- Firefighters must safely drive fire vehicles (weight of which is in excess of 24,000 lbs.) in emergency situations, and in all kinds of weather and traffic conditions.
- Duties of firefighters require them to work in high places, and also in cramped, small contaminated confined spaces.
- Firefighters require the physical strength to lay and connect hose, raise and climb ladders; direct high pressure water streams, and have the ability to perform work tasks wearing protective clothing and self contained breathing apparatus (approximate weight of 50 lbs.) in noxious and/or smoke filled environments.
- Firefighters are required to perform, efficiently and effectively, duties under severe, stressful and emotional conditions such as extricating victims from vehicle collisions and fires, as well as performing CPR and First Aid at these scenes.
- Communications play a vital role in the Fire Service. Firefighters must have the ability to receive messages from sometimes confused and excited citizens. Firefighters must be able to relay concise messages via telephone, two-way radio and the written word.
- Firefighters are required to perform maintenance duties on all apparatus, equipment and department property and keep records of it. Must be able to exercise independence of judgment in fire prevention, inspection and clerical tasks.
- With these factors in mind, it will suffice to say that all firefighters have to be in excellent physical and mental health and have no medical and or mental condition that could interfere with their ability to perform all required duties efficiently and safely.
